

HK PROFESSIONAL FIREARMS TRAINING

At HK USA, we are not just focused on selling a product but instead providing a full product solution. This is why HK training exists, to arm you with the tools to be successful with your HK firearms.

ARMORER PROGRAMS

HK Armorer Courses are offered for two audiences and in two formats.

For our commercial customers, we offer Armorer Courses which cover our full line of commercial customer firearms. For our Mil/LE customers, we offer a wider range of Armorer Courses which extend across our complete product catalog.

HK Armorer Courses are taught at our headquarters in Columbus, GA or via Mobile Training Team (MTT) at host locations across the country. Each HK Armorer Course provides instruction and certification on the detailed and life-cycle maintenance of a specific HK weapon, with all weapons, tooling and equipment provided.

James Williamson
Head of Training, Heckler & Koch USA

OPERATOR PROGRAMS

HK Operator Courses provide adaptive and rapidly progressive instruction on how best to employ specific HK weapons. Available in limited opportunities either formatted as open enrollment opportunities for our commercial customers or in restricted opportunities for our Mil/LE customers, these courses are either conducted at our headquarters in Columbus, GA or via Mobile Training Team (MTT) at host locations across the country. Turnkey solutions, these courses can be coordinated with all weapons, ammunition and equipment provided.
